

PMR CONSULTING

SINCE 2005

Safety Consulting

With today's safe work environment responsibilities, an active and growing Safety program is more important than ever.

Combine this program with our Primary Health Care Program ... for a positive impact on ALL your employee healthcare needs!

If a worker is injured at your workplace, you're held responsible for all incurred costs, as well as any potential citations that might arise. These injuries and citations could potentially cost you millions of dollars!

Today's workplace safety requirements are ever changing and often filled with ambiguous and incomprehensible language. The result? Confusion! Luckily, PMR removes the confusion with one-stop solutions to training, program creation, inspection, and so much more.

Premier Medical Resources (PMR) offers a wide range of safety services to reduce injuries and citations. We can refine or modify your existing program, or help develop and implement a new program for you.

PMR offers the following services with our Safety program:

- Safety training
- Safety consulting
- Mock inspections
- Creation of OSHA/MSHA required safety and health plans
- First report of injury forms
- Witness statement forms
- Job site safety analysis
- OSHA/MSHA record keeping
- Employee/Guest badge administration
- OSHA 10/30 hour courses
- Accident investigations
- Placement of an onsite safety specialist

Note: Most training can be provided onsite or offsite.

How do you get started?

Visit our Website or call us today so we can help you realize your employee healthcare program objectives!
